产品特点 Product Features

多弹簧结构 Multi-spring construction

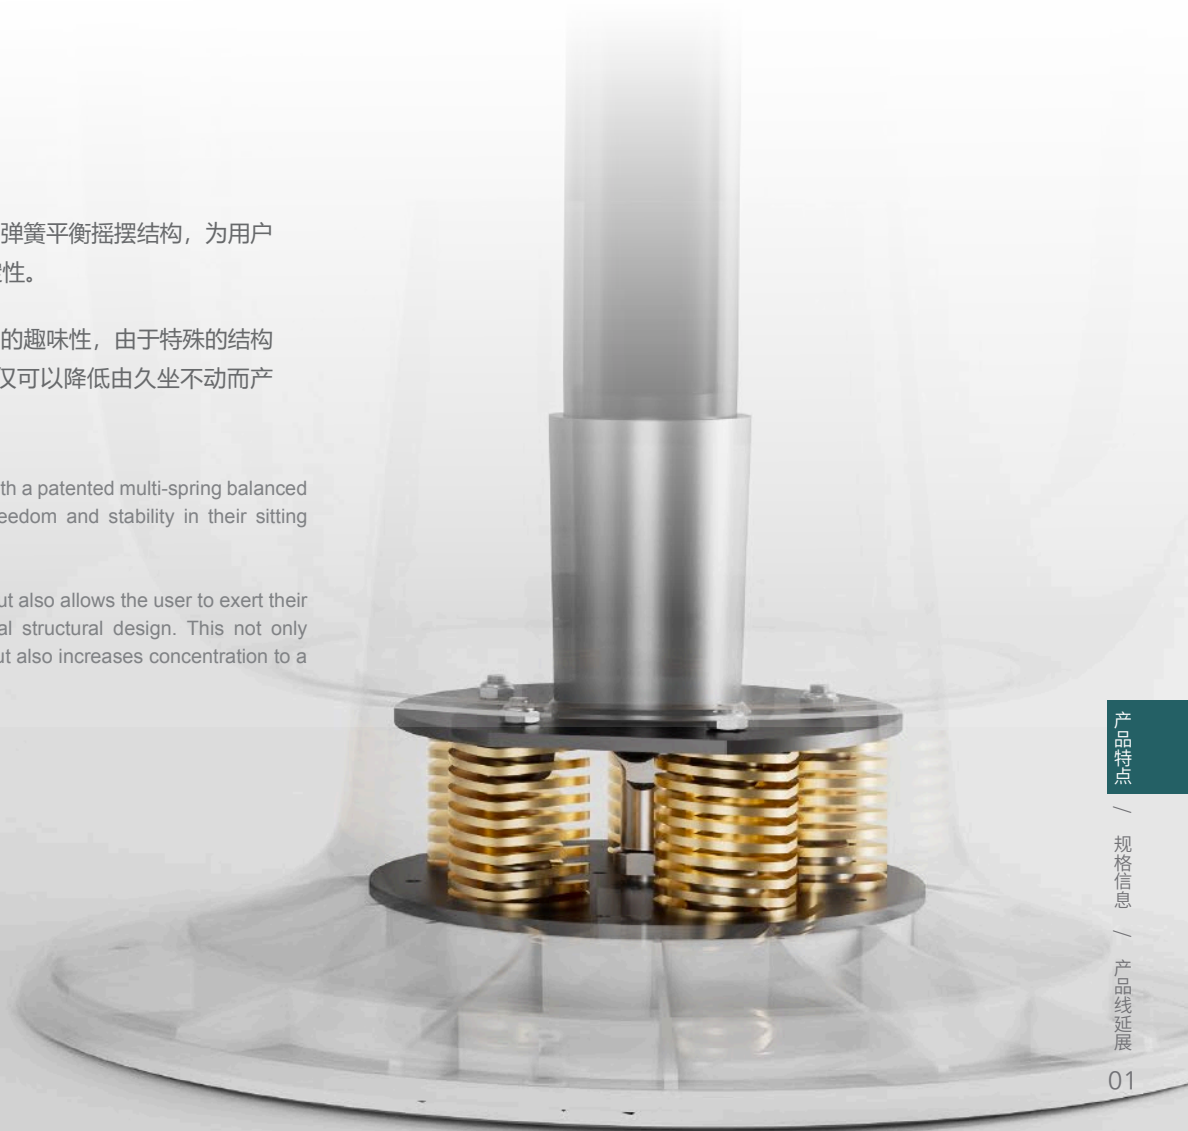

Sway Stool 动态摇摆凳打破常规，利用专利的多弹簧平衡摇摆结构，为用户提供全方向的摇摆自由度，并始终保持坐姿的稳定性。

Sway Stool 动态摇摆凳不仅可以增加工作过程中的趣味性，由于特殊的结构设计，用户在摇摆的过程会进行主动发力。这不仅可以降低由久坐不动而产生的僵硬，还能在一定程度上增加专注度。

The Sway Stool Dynamic Swing Stool breaks the mold with a patented multi-spring balanced rocking structure that provides users with full swing freedom and stability in their sitting position at all times.

The Sway Stool not only adds fun to the work process, but also allows the user to exert their own force during the swing process due to the special structural design. This not only reduces the stiffness caused by sitting for a long time, but also increases concentration to a certain extent.
